

## PRESS RELEASE

The Niagara District Airport Commission and Allied Services of Canada have finalized agreements whereby Allied Aviation Services of Niagara, ULC ("Allied Aviation") will operate the Fixed Base Operation at Niagara District Airport (**CYSN**) located in Ontario, Canada effective August 31, 2012. The initial contract term is for five (5) years with options to extend the term for a total of 15 additional years. The Niagara District Airport is a general aviation airport located in Niagara-on-the-Lake. The Airport is 15 kilometers from the famous Niagara Falls and one hour from Toronto. This new FBO operation complements the company's existing operations in both Canada and the USA. Management support, training and start up efforts will be provided by the company's Toronto operations.

Allied Aviation will be providing fuel storage and supply, and into plane and de-icing services, in addition to services customarily provided at FBOs, such as aircraft storage, passenger and pilot lounges, flight planning, and other passenger support services. The Niagara District Airport handles approximately 40,000 aircraft movements per year. With its close proximity to the Falls, the Airport provides a convenient arrival and departure point for those aircraft operators who want to be close to this world famous destination.

As the popularity of the Niagara Region grows with nearby hotels, family parks, wineries, golf courses and cultural attractions, increased flight activity is expected at Niagara District Airport. Allied Aviation plans to implement its brand of airport fueling services and make enhancements to the existing FBO facilities in order to assist the Airport Commission in promoting economic growth at the Airport.

The Niagara District Airport opened in 1929 and provided training services to the Royal Canadian Air Force during WW II. It is located in the heart of the Niagara Region, ideally positioned for both business and tourists.

Allied Aviation is an independently owned and operated airport service company dedicated to providing fuel and related aviation services. Allied Aviation provides a full range of services including investment in fuel system infrastructure development, including management, construction and ownership related to facilities both on and off airport around the world. Allied Aviation stands on its reputation as being one of the leading commercial and general aviation fueling companies in the Western Hemisphere. The safety of our employees, airline customers and airport environment is of utmost importance. We strive to provide a safe workplace while maintaining an excellent on-time performance to meet the needs of our customers.
